## FLEXITOG™ SYSTEM

Following extensive research and customer feedback we have developed an innovative new adaptable product system, designed to suit your needs covering the full range of workwear applications. **12**

### ***Ice Diamond™***

A luxurious collection for unbeatable warmth! Designed to bring ultimate comfort to those working in deep freeze conditions. **16**

### ***ENDURANCE™***

Our most lightweight, breathable and durable collection. Designed to help highly active users in cold environments endure! **20**

### ***CLASSIC™***

Our best selling collection trusted by thousands of workers across the globe for all-round warmth and comfort. **28**

# FlexiTog®

## **MARKET LEADING** MANUFACTURERS OF **WARM AND COMFORTABLE** **PROTECTIVE THERMAL WORKWEAR.**

Our products are used in temperature controlled areas such as cold storage, food processing or manufacturing and foodservice. FlexiTog workwear is also widely used in the colder winter months.

### RefrigiWear®

FlexiTog is part of the global RefrigiWear family, and serves UK and Europe.

## PRODUCT WARRANTY

We are so confident about the quality of our clothing for freezers and cold store warehouses, that we provide our unique warranty!

FlexiTog offers a 1-year warranty for our clothing against manufacturing defects in materials and workmanship. This warranty applies only to products that were purchased from FlexiTog or a FlexiTog authorized reseller.

This warranty does not cover damage caused by normal wear and tear, misuse, neglect or obvious abuse. Footwear is warranted against defects in workmanship and materials. However, if within 3 months of purchase, a defect occurs in FlexiTog footwear as the result of normal use, and there is no evidence of misuse, neglect or obvious abuse, we will happily repair the defect, exchange the footwear for a new pair or provide a purchase credit.

# THE FLEXITOG PROCESS

## A holistic approach to product design

We take the feedback from those using our products and then design and create unique solutions to meet customer requirements. This is a continuous journey for FlexiTog.

## EUROPEAN LOCATIONS

### Providing a global reach

With two key distribution centres in central European locations we can ship to you quickly with no tariffs or customs.

This also makes it simple for pan-European companies to manage.

**ONE** COMPANY  
PRICE  
PLATFORM

We distribute our products globally, and we have native speaking representatives in UK, France, Germany, Italy, Spain, and the Benelux region.

## CSR

# ENVIRONMENT

### European Supply-chain

Unlike many manufacturers we produce the majority of our items from within Europe, therefore massively reducing the carbon footprint through reducing transport, in comparison to importing from the Far East.

As partway through our 'Closer to Home' campaign we are already seeing thousands of transport miles saved through sourcing our main product lines closer to home.

### Recycling

An estimated 81% of our outer packaging is recyclable. The impact of non-recyclable packaging is of concern to us, hence our ongoing actions to maximise the use of recyclable materials including textiles.

Look out for the 'Recycling' logo on our website to show that the item you have selected uses recyclable options. For end-of-life garment recycling we have partnered with Avena. We also offer garment recycling to all our UK customers for used FlexiToG clothing.

We have partnered with a local waste management company. All our waste is sorted at our Head Office distribution centre to ensure that we are sending as much cardboard to a recycling centre as possible.

### Carefully chosen Couriers

We use FedEx as our primary courier in the UK. They have been chosen due to their commitment to carbon neutrality. As a company, FedEx aims to attain carbon-neutral operations by the year 2040.

To achieve this goal, FedEx plans to allocate an initial investment of over \$2 billion across three primary areas: sustainable energy, carbon sequestration, and the transition of their parcel force vehicles to electric vehicles.

## CSR ETHICAL

### Ethical Trading

We believe strongly in ethical principles and good stewardship. We are therefore proud to guarantee that we trade according to the Ethical Trading Policy, Modern Slavery and Human Trafficking Policy and Bribery statement and policy which are all found on our website.

We work with Sedex and other third parties bodies to ensure that all our vendors trade according to our ethical trading requirements outlined in the criteria below:

**Sedex**

**Ethical  
Trading  
Initiative**

### No Child Labour

We ensure that all our factories share the same ethical values so we can ensure that there is no child labour.

### No Discrimination

We ensure equal treatment and opportunities for all individuals.

### Fair Wage

Wages are fair and comparable to industry standards and will always exceed the minimum wage.

### Safety

Working conditions are safe and hygienic.

# SIZING GUIDE

## CLOTHING

### MEASURING GUIDE

Always measure against the body including any undergarments (thermals etc) that would be worn under the outer garments.

### MEASURING YOUR CHEST

Measurements should be taken from under the arm at the fullest part around the chest horizontally around the full girth of your body.

### MEASURING YOUR WAIST

With your feet placed together, measurements should be taken from around the natural hip line (put one finger between the tape and your body before you measure).

**If in doubt go up a size!**

## FOOTWEAR

### MEASURING GUIDE

All our footwear conforms to the standard UK sizing convention.

UK	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
EURO	36	37	38	39	41	42	43	44	46	47	48	49	50	51	52
USA	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

## MENS

SIZE	CHEST CM	WAIST CM
XS	100-104	75-80
S	104-109	80-85
M	109-115	85-90
L	115-120	90-95
XL	120-126	95-100
2XL	126-131	100-106
3XL	131-136	105-112
4XL	136-142	112-118
5XL	142-148	118-124
6XL	148-154	124-130

## WOMENS WEAR

SIZE	BUST CM	WAIST CM	HIP CM
6	90-95	74-78	96-101
8	96-100	79-83	102-107
10	101-106	84-89	108-113
12	107-112	90-95	114-118

16	119-123	102-107	124-129
18	124-128	108-113	130-135

## GLOVES

### WHICH HAND?

Measure the diameter at the knuckles of your dominant hand.

### THE RIGHT FIT

Gloves that are too tight will result in cold hands, so if in doubt go up a size!

SIZE	CM
XS	15
S	18
M	20

## Enhance your corporate image

Custom fabric colours, company names, logos, or even individual staff names can be applied to the garments of your choice. Call us today for advice on the most suitable application for you.

## EMBROIDERY, HEAT-SEAL OR BADGES CAN BE APPLIED TO:

1 BREAST

2 POCKET

3 SLEEVE

4 BACK

5 TROUSER LEG

6 HAT

For your customised quote and an estimated lead time on bespoke branding, please get in touch:

# CLOTHING CERTIFICATION

## EN 342:2017

The standard related to **garments for protection against cold** ranging from chill (-5°C) through to cold store (-25°C) to deep freeze (-40°C).

### A. THERMAL INSULATION (WITH MOTION)

Indicates the thermal insulation of the garment in  $I_{cler}$  ( $m^2.K/W$ ), the higher the value the better the insulating properties. The [B] indicates that the item has been tested with thermal undergarments specified in the standard.

### B. AIR PERMEABILITY

This indicates breathability of a garment, (1 highest, 3 lowest) breathability. A high air permeability allows for proper dry evaporative heat loss required to keep you warm and comfortable.

### C. WATERPROOF PENETRATION

Determines waterproof properties - this is not a requirement as garments being used in sub zero temperatures do not require waterproofing capabilities.

## EN ISO 20471:2013

The standard for the safety requirements and test methods of **High-Visibility Clothing** applicable to high-risk situations.

### D. HI-VIS CLASS 1

The lowest level of visibility. Items that commonly meet Class 1 include hi-vis trousers when worn separately from other hi-vis garments.

### D. HI-VIS CLASS 2

The intermediate level of visibility. Items that commonly meet Class 2 include hi-vis sleeveless vests.

### D. HI-VIS CLASS 3

The highest level of visibility. Items that commonly meet class 3 are hi-vis jackets and sleeved hi-vis vests.

**EN ISO 20471:2013**

# FOOTWEAR CERTIFICATION

## EN ISO 20345:2011

The standard protection for professional safety footwear.

There is a qualifying test which all safety footwear must pass and then other additional tests relating to additional safety aspects of the boot.

### A. SHORT CODE CATEGORIES

- SB** Toe protection to 200J
- SB-P** As above with a penetration resistant sole
- S1** Upper from material other than all rubber or polymeric +Closed seat region +SB+A+E
- S1-P** As above with the addition of a penetration resistant sole
- S2** Has met all S1 Requirements with the addition of WRU (Water-resistant upper)
- S3** Has met all requirements for both S1 & S2 and also includes P (penetration resistant sole) and cleated outer soles

### B. OPTIONAL CATEGORIES

- HRO** Heat resistant outsole compound tested at 300°C
- P** Penetration resistant outsole tested at 1100 Newtons force
- A** Electrical resistance between foot and ground of between 0.1 and 1000 Mega Ohms
- C** Electrical resistance between foot and ground of less than 0.1 Mega Ohms
- CI** Insulation against cold (-17°C). Upper is tested for it's insulating properties.
- HI** Insulation against heat
- E** Energy absorption of the seat region tested at 20 joules

- WRU** Water resistant upper leather
- I** Insulating footwear
- AN** Ankle protection
- WR** Water resistant footwear
- CR** Cut resistant footwear
- M** Metatarsal protection (100J)

### C. SLIP RESISTANCE

- SRA** Minimum CoF of 0.28 in the heel and 0.32 tested flat using a pressed clay tile floor surface with Sodium Lauryl Sulphate lubricant
- SRB** Minimum CoF of 0.13 in the heel and 0.18 tested flat using a stainless steel floor surface with Glycerol lubricant
- SRC** Has met requirements of both SRA & SRB

**EN ISO 20345:2011**

**S3 CI SRA**

# GLOVE CERTIFICATION

## EN 388:2016

The EN 388 is the standard related to **protection levels for safety gloves**. This certificate assess the glove protection levels for abrasion, blade cuts, tears and punctures.

### A. ABRASION

This tests how many revolutions it takes to create a hole, with an abrasive material under a stipulated pressure. Rated from (1-4), 4 being the most resistant.

### B. COUPE CUT

This tests the number of cycles for a blade, running at a constant speed, to cut through the material. Rated from (1-5), 5 being the most resistant to cuts.

### C. TEAR

This tests the amount of force (N) required to tear the glove. Rated from (1-4), 4 being the most resistant.

### D. PUNCTURE

This tests the amount of pressure required to puncture material with a standard size point. Rated from (1-4), 4 being the most resistant.

### E. BLADE CUT ISO 13997

If the knife gets dull during the coupe test, see point B, this test shall be performed instead. The result is given by a letter, A to F, where F indicates the highest protection.

### F. IMPACT

If the glove has an impact protection, this information is given by the letter P as the 6th and last sign. If no P sign, no impact protection is claimed.

## EN 511:2006

Focused on **protecting hands against cold** and is based on thermal resistance to convective and contact cold, with an optional test for water permeability.
